

pure collagen peptides + C

Get your glow on.

pure collagen peptides + C promotes healthy skin by supporting collagen formation and skin elasticity. It is produced from pure bovine collagen using a proprietary process to enhance absorption.

The combination of pure collagen peptides and pure vitamin C helps support healthy connective tissue production in the body. Healthy connective tissue is key to strong joints, healthy gastrointestinal membranes, skin healing and regeneration, and hydration. Overall supporting a natural healthy glow and healthy ageing.

With a pleasant, natural vanilla flavour, the taste is light and not overly-sweet or overpowering, so you can take it however and whenever you like!

Each 16g Serve (Approx. 2 Scoops) Contains:

| | |
|------------------------------|--------|
| Hydrolysed Collagen (Bovine) | 15 g |
| Ascorbic Acid (Vitamin C) | 150 mg |

Excipients: Glycine, Natural Vanilla Flavour, Colloidal Anhydrous Silica, *Siraitia grosvenorii* (Monk Fruit) extract, *Stevia rebaudiana* leaf extract (Stevia).

Directions for use: Adults take 16g (2 provided scoops) mixed with water, or as preferred, one to three times per day.

Warnings: Vitamin supplements should not replace a balanced diet. If symptoms persist, talk to your health professional.

therapure®

Straight-up, honest labels.

When it comes to our products, you won't need to worry about what harsh excipients, fillers or hidden ingredients are in our capsules, as we pride ourselves in complete straight up label transparency. We never leave an ingredient off our clear labels!

Healthy skin from within

The gut skin connection

Healing your gut and reducing gut inflammation influence your overall health, especially your skin. This supportive blend of collagen and vitamin C encourages the rebuilding of cells in your gut, supporting your overall health and giving you a healthy glow.

Better together

The combination of pure enzymatically hydrolysed collagen with vitamin C provides synergistic benefits to all connective tissue in your body, including your gut and skin.

The collagen in your skin is primarily made up of **type I and type III collagen** - these types of collagen are especially useful for encouraging smooth skin, promoting elasticity, and increasing skin hydration.

Vitamin C stimulates the biosynthesis of collagen, making collagen and vitamin C a powerful skin duo to bring you beautiful, healthy skin that glows from the inside out.

Clean and light

pure collagen peptides + C is an amazingly pure and light flavoured collagen that leaves you feeling energised and refreshed. Made from all-natural ingredients, it is free from sugars, artificial sweeteners, and preservatives. It is extremely versatile, being suitable to mix into any drink (without overpowering the flavour) or enjoyed with plain water.

therapure®

Formulations that work

pure collagen peptides + C was formulated by Naturopaths and Nutritionists using a combination of powerful ingredients that can do wonders for skin health and elasticity, as well as supporting your overall health through gut membrane and joint support.

We always list all the excipients on the label - so you know exactly what is going into your body.

5 reasons to care for your skin from within

♥ Healthy skin can be a sign of overall wellness

🔄 Skin regenerates itself, creating a new layer every month

🛡️ Skin is our primary barrier from the outside world. Keeping it strong and healthy increases its resistance to environmental stressors.

⬇️ Vitamin C creams and collagen serums can only go so far in reaching the lower layers of our skin (the dermis) where the majority of collagen and vitamin concentrations are found.

😊 Preventative measures are always easier than corrective measures.

No token ingredients

We supply ingredients in quantities that can make a difference. We never add token ingredients to make the product look good.

When to recommend **pure collagen peptides +C**

- Looking for improved skin texture, tone, and smoothness
- Looking for gut support
- Looking for bone and joint support
